Not sure which one to choose?

Ask your doctor or dietitian, or send us your question at nutripak.np@gmail.com or on WhatsApp 0313-3346732. We are happy to help.

Nutripak products are nutritional supplements and are not a substitute for medical treatment. They are not complete meal replacements.

SUBSET

Complete Nutrition

A complete, balanced nutritional supplement for daily health needs. Take it in addition to your regular diet, or in the amount your doctor or dietitian advises.

Key points

- Whey protein isolate and soy protein isolate
- Carbohydrate from maltodextrin with some sucrose; fat from MUFAs and vegetable fats
- Contains FOS, a prebiotic fiber that supports gut health
- Vitamins A, D, E, C and B-complex, folic acid, and minerals including calcium, potassium, magnesium, iron and zinc
- Not a complete meal replacement

How to prepare

Mix 54 g powder (5 level scoops) in 190 ml water. One prepared glass is 230 ml.

Pack

400 g tin, Vanilla flavour

Per serving

Energy: 235.9 kcal
Protein: 8.8 g
Carbohydrate: 34.8 g
Fat: 6.8 g
Calcium: about 168 mg per 230 ml glass
Potassium: about 380 mg per 230 ml glass

SUBSET contains maltodextrin and sucrose and is not designed for diabetes management. For diabetes, please see ADA-glu.

ADA-glu

Diabetic Care Nutrition

A nutritional supplement for diabetes management, to be used as part of a dietary plan set by your doctor or dietitian.

Key points

- For adults with diabetes, under medical guidance
- Carbohydrate balanced with FOS fiber, whey and soy protein, and MUFAs
- Protein 19.61% and fiber 2 g per 100 g
- For Type 1, Type 2 or gestational diabetes, use only under close medical supervision and glucose monitoring

How to prepare

Mix 54 g powder (5 level scoops) in 190 ml water. One prepared glass is 230 ml.

Pack

400 g tin, Vanilla flavour

Per serving

Protein: 10.6 g (19.61 g per 100 g)
Dietary fiber: 1.1 g (2 g per 100 g)

A supplement, not a replacement for your prescribed treatment. In controlled amounts, as your doctor or dietitian advises, it can partly replace a meal.

PROTEIOS

Protein Support

A premium whey protein blend that supports muscle protein synthesis, lean body mass and athletic performance.

Key points

- Unflavored, so it blends into your regular diet without changing the taste
- For active adults and anyone wanting to raise their protein intake
- Patients should use it under medical guidance

How to prepare

Mix 10 g powder (1 level scoop) in 100 ml water.

Pack

250 g tin, Tasteless (25 servings)

Please follow your doctor's or dietitian's advice on how much to take each day.

Using Nutripak safely

- Nutripak products are supplements. They are not medicines and not a substitute for medical treatment.
- Please speak to your doctor or dietitian first if you are pregnant or breastfeeding, buying for a child, or have kidney, liver or heart disease.
- Do not change or stop any prescribed medicine, including insulin, because of a supplement.
- Many people take more than one product, but your doctor or dietitian is the best person to advise on this, especially for diabetes or kidney conditions.
- Store in a cool, dry place and keep the tin closed after use.
